One fixed-window viewing frame

One 150 x 120 mm frame; 100 x 70 mm opening; 25 mm borders.

Print single-sided, 100% / Actual size, Fit off. Page 2 shows the U cut.

Solid outer/inner outline: cut. Dashed center: temporary fold only.

Short pink corner marks: view references, never cuts. Keep TOP upright.

Same safe mapped point and view cue; approximate eye/arm distance and angle.

Note a changed view. This opening is not a measured area or count denominator.

Printer-supported paper, ruler, scissors, pen. Adult cutting help when needed.

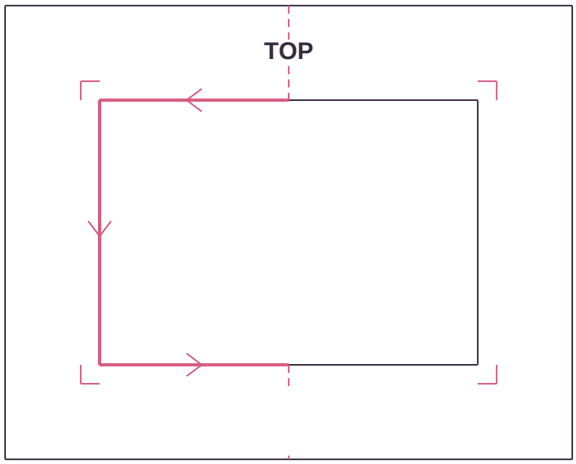

50 mm scale check - measure before cutting

No knife, punch, glue or backing. Do not look at the sun through the frame.

Cut, orient and revisit a view

Reduced diagrams only - use page 1 for cutting. No permanent assembly.

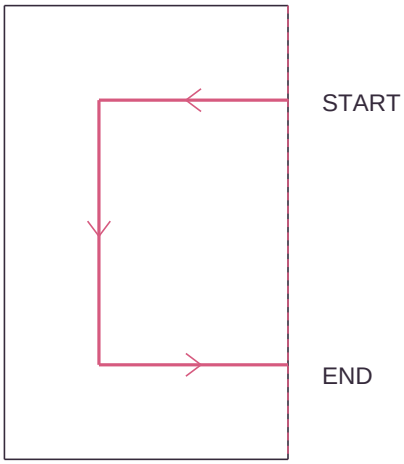

1. Flat printed face

Dashed center: temporary fold

Pink arrows: U-cut order

2. Folded printed half

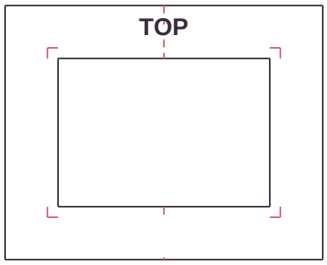

50 mm left / 70 mm down

50 mm right to folded edge

1. Match Letter/A4 paper. Print single-sided, Actual size 100%, Fit off; measure 50 mm.
2. Cut outer border first; fold the dashed center temporarily, printed faces outside.
3. At START cut left 50 mm, TURN down 70 mm, TURN right 50 mm to END. Cut both layers; never cut the dashed fold or corner marks.
4. Remove the folded center piece and unfold flat. Keep TOP upright. No glue, backing or mounted part is needed.
5. Use the same safe mapped point and view cue where practical. Hold at approximately the same eye/arm distance and angle; note a changed view. Do not look at the sun through the frame.
6. Look through the opening, then set the frame aside to write on a fresh One Place visit sheet. Use the existing map, feature, sketch and story sheets as needed.

Digital example - synthetic writing, not a field result

Place nickname: Oak Corner

View cue: From bench toward forked branch

The same leaf edge looked curled on the second visit.

Angle changed: not a measured change. The frame focuses attention, not a measured area.
