Egret tracing and cutout studies

Egret rearing profile / trace interior lines; cut outer contour

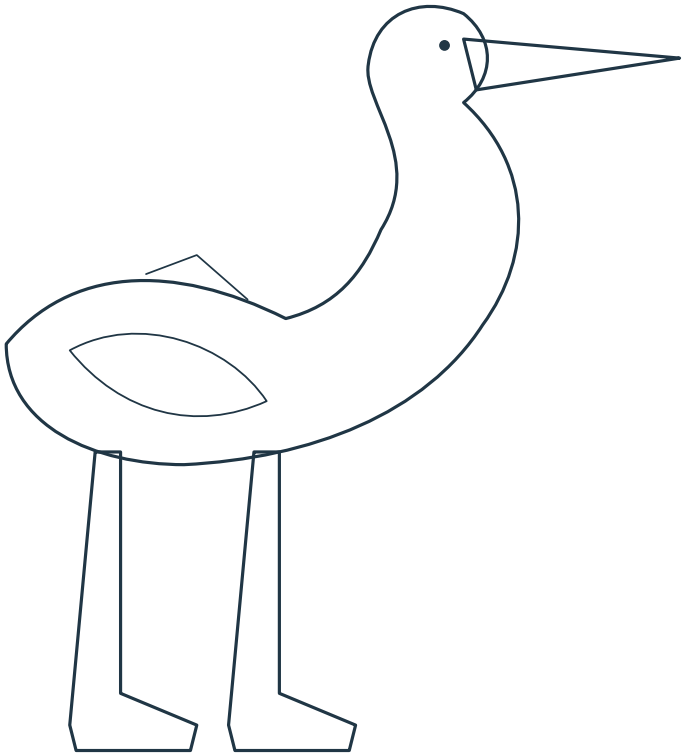

Thin s neck, dagger bill and long legs

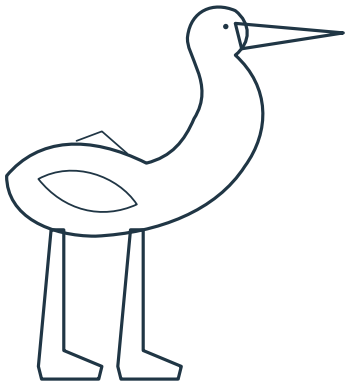

50 mm scale check / print at actual size (100%)

Egret tracing and cutout studies

Smaller rearing profile views / check detail before use

100 mm longest axis

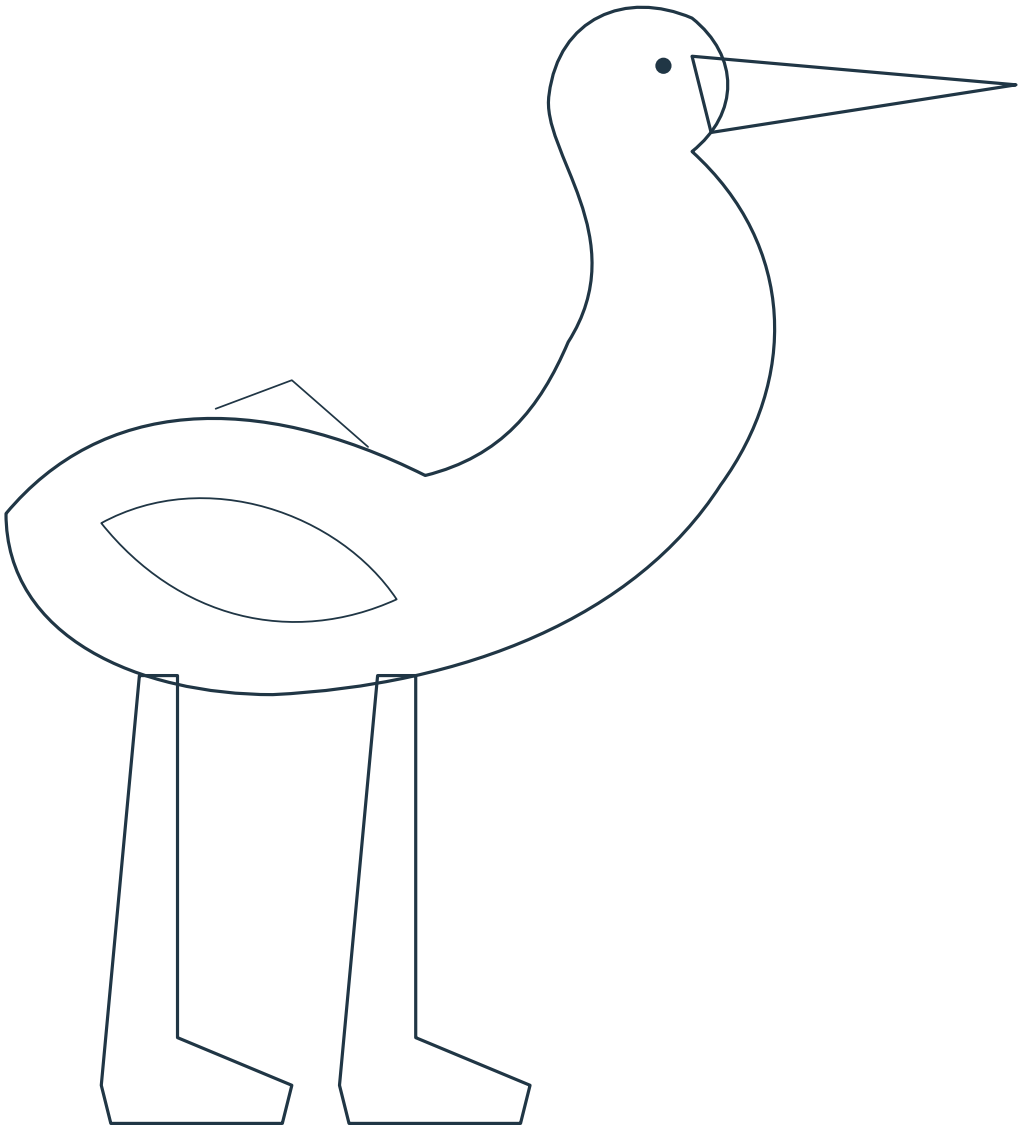

50 mm longest axis

50 mm scale check / print at actual size (100%)

Egret tracing and cutout studies

Egret slender standing study study / identifying detail

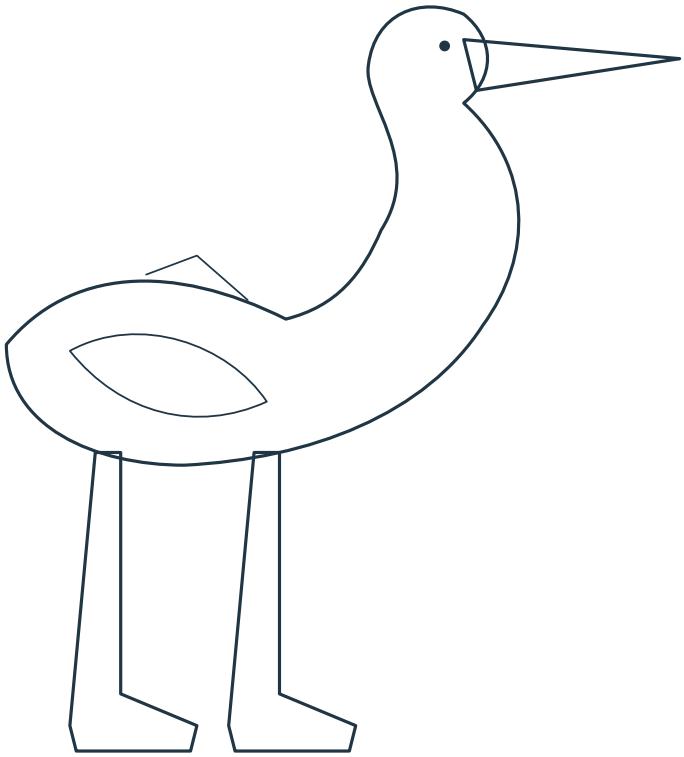

Slender standing study study: trace detail; cut outer edge only.

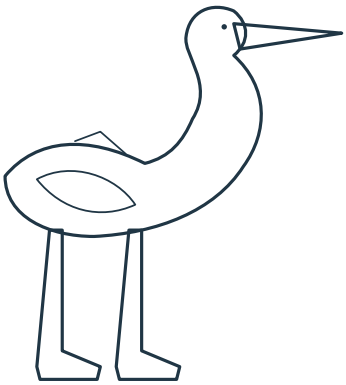

50 mm scale check / print at actual size (100%)

Egret tracing and cutout studies

Smaller slender standing study views / compare subject recognition

100 mm longest axis

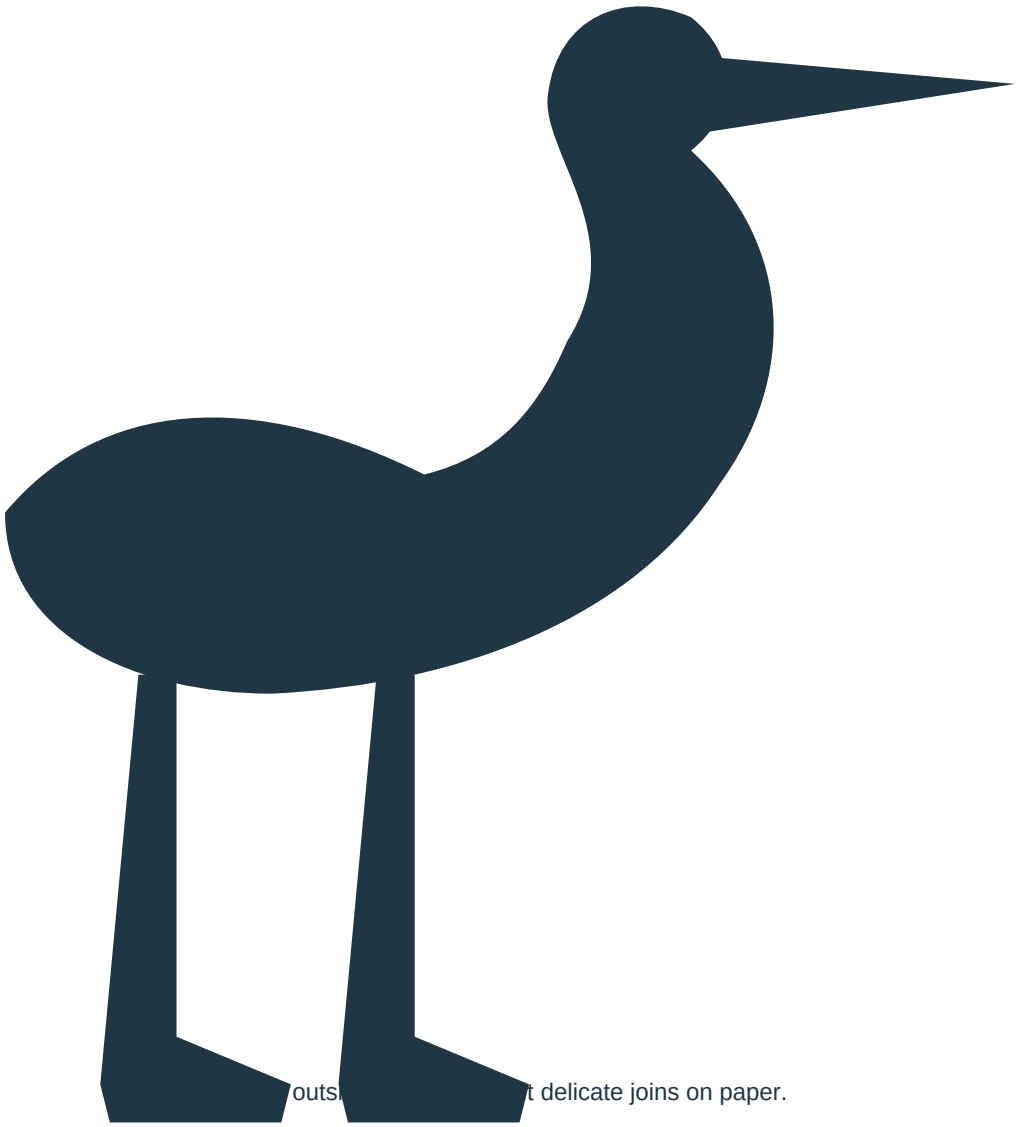

50 mm longest axis

50 mm scale check / print at actual size (100%)

Egret tracing and cutout studies

Outside-only solid shape / broad paper mask

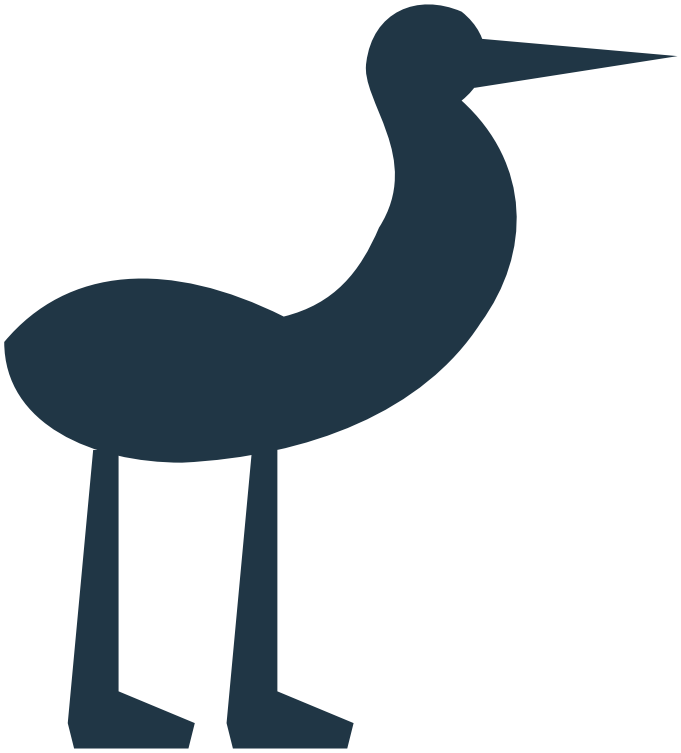

outsi t delicate joins on paper.

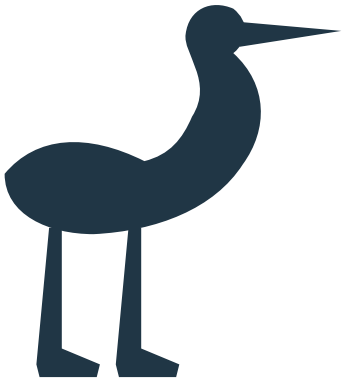

50 mm scale check / print at actual size (100%)

Egret tracing and cutout studies

Smaller solid shapes / inspect the smallest outline

100 mm longest axis

50 mm longest axis

50 mm scale check / print at actual size (100%)

Egret tracing and cutout studies

How to use rearing profile, slender standing study and solid views

PURPOSE

Stylized egret studies for tracing, coloring and loose paper cutouts.
Rearing profile, slender standing study and solid views have distinct drawing roles.
Each view has 150, 100 and 50 mm longest-axis versions.

MATERIALS

Use plain paper for tracing or coloring and suitable card for cutouts.
Gather a pencil, coloring materials, ruler and scissors.

PRINT AND CHOOSE

Use the Letter or A4 edition that matches the printer tray.
Print at actual size (100%); disable fit-to-page.
Measure the 50 mm bar and an artwork axis before transfer.
Begin with 150 mm; choose 50 mm only when details remain clear.

USE AND STORE

Trace or color interior marks; cut the outer contour only.
Do not turn drawing details into slits or cutter bridges.
Trial-cut plain paper and support narrow fins, bills or tails.
Use a larger size if the material cannot hold a fine join.
Label reusable cutouts on the back and store them flat.

LIMITS AND REVIEW

These are craft studies, not species identification or anatomy references.
No cutting-machine compatibility or cutter-ready claim is made.
Inspect recognition and fragile joins at 50 mm on real paper.
Reviewed digitally; physical printing and cutting were not tested.
