Gecko tracing and cutout studies

Gecko low pad-foot lateral / trace interior lines; cut outer contour

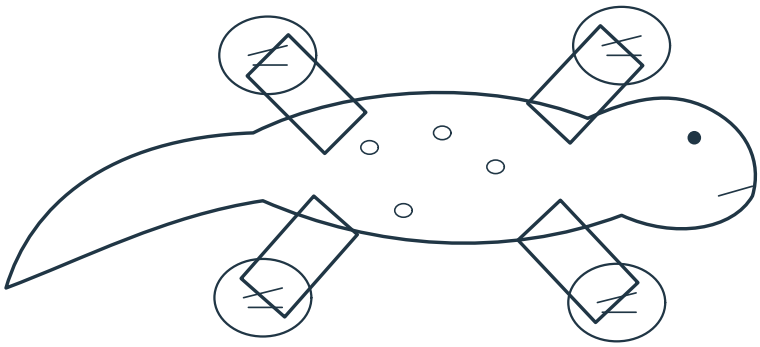

Adhesive toe pads, low lizard body and long tail

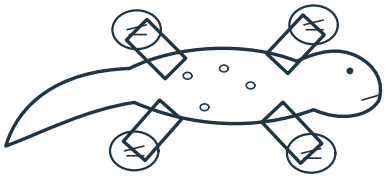

50 mm scale check / print at actual size (100%)

Gecko tracing and cutout studies

Smaller low pad-foot lateral views / check detail before use

100 mm longest axis

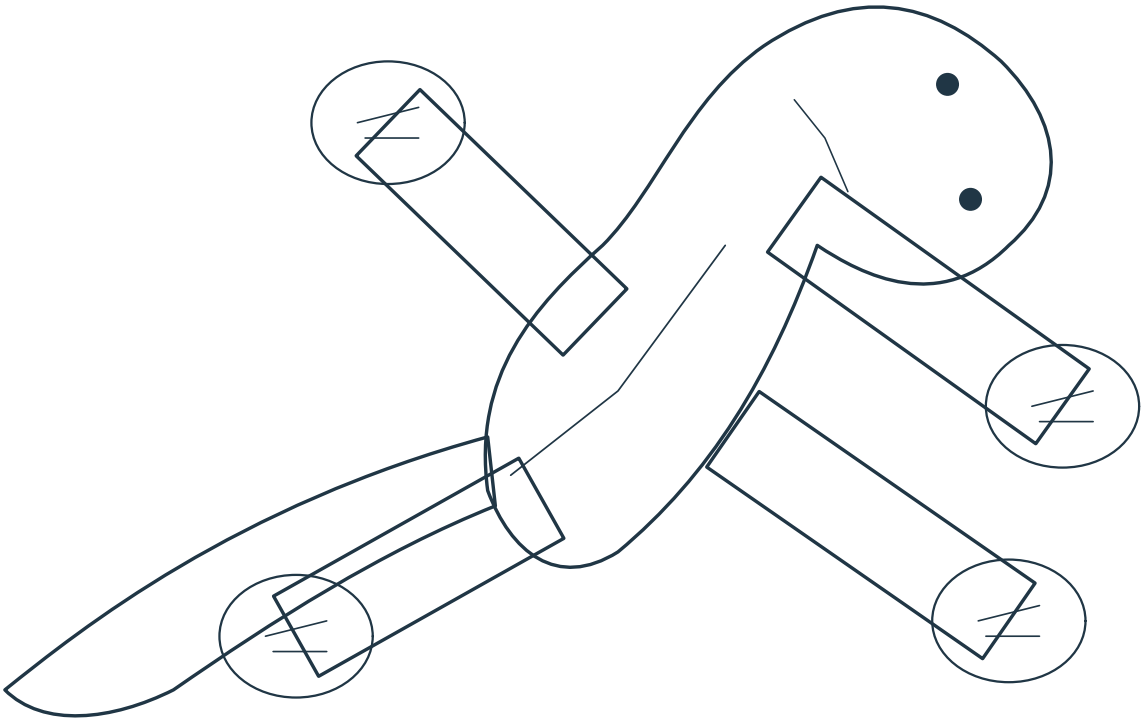

50 mm longest axis

50 mm scale check / print at actual size (100%)

Gecko tracing and cutout studies

Gecko wall-climbing oblique study / identifying detail

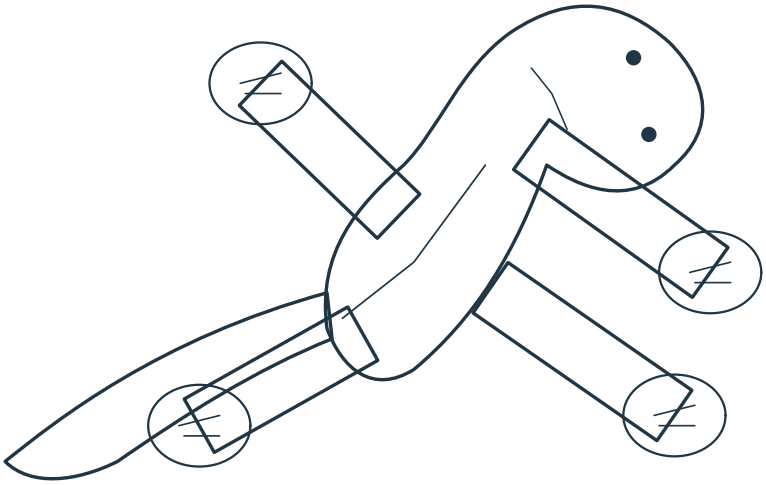

Wall-climbing oblique study: trace detail; cut outer edge only.

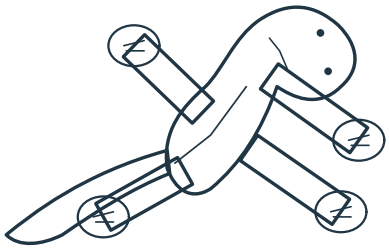

50 mm scale check / print at actual size (100%)

Gecko tracing and cutout studies

Smaller wall-climbing oblique views / compare subject recognition

100 mm longest axis

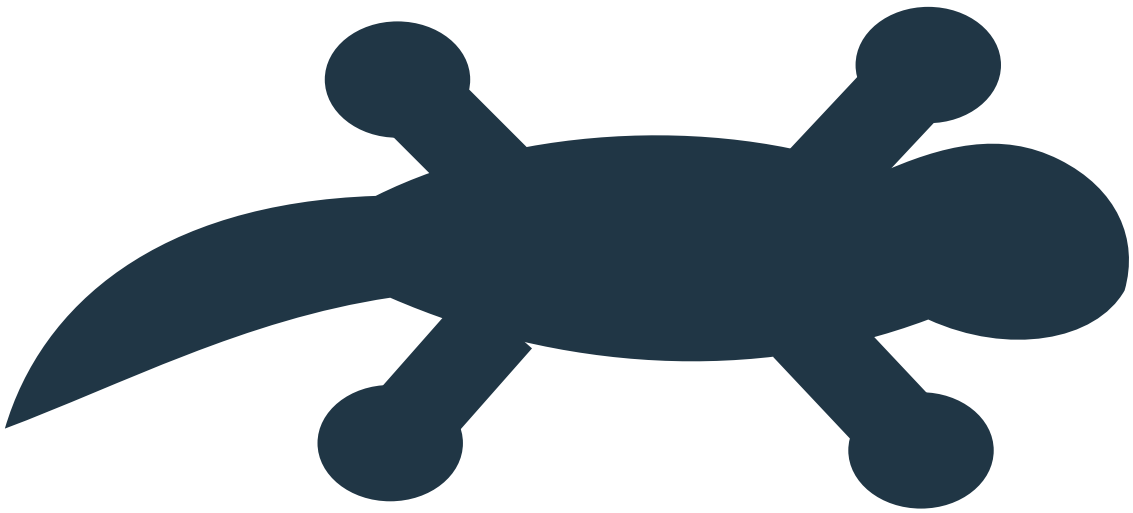

50 mm longest axis

50 mm scale check / print at actual size (100%)

Gecko tracing and cutout studies

Outside-only solid shape / broad paper mask

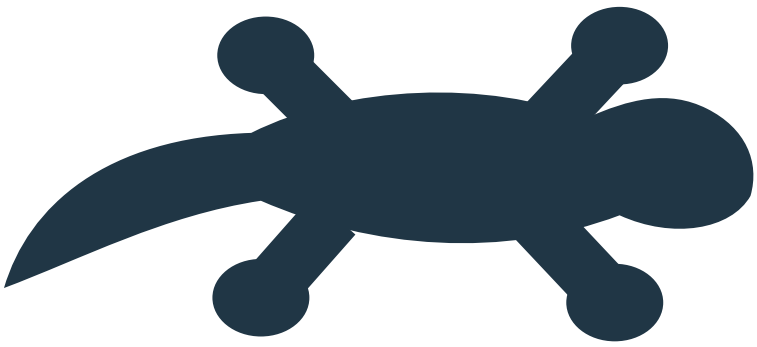

Solid outside shape; trial-cut delicate joins on paper.

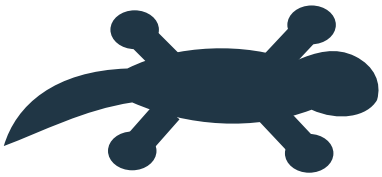

50 mm scale check / print at actual size (100%)

Gecko tracing and cutout studies

Smaller solid shapes / inspect the smallest outline

100 mm longest axis

50 mm longest axis

50 mm scale check / print at actual size (100%)

Gecko tracing and cutout studies

How to use low pad-foot lateral, wall-climbing oblique and solid views

PURPOSE

Stylized gecko studies for tracing, coloring and loose paper cutouts.
Low pad-foot lateral, wall-climbing oblique and solid views have distinct drawing roles.
Each view has 150, 100 and 50 mm longest-axis versions.

MATERIALS

Use plain paper for tracing or coloring and suitable card for cutouts.
Gather a pencil, coloring materials, ruler and scissors.

PRINT AND CHOOSE

Use the Letter or A4 edition that matches the printer tray.
Print at actual size (100%); disable fit-to-page.
Measure the 50 mm bar and an artwork axis before transfer.
Begin with 150 mm; choose 50 mm only when details remain clear.

USE AND STORE

Trace or color interior marks; cut the outer contour only.
Do not turn drawing details into slits or cutter bridges.
Trial-cut plain paper and support narrow fins, bills or tails.
Use a larger size if the material cannot hold a fine join.
Label reusable cutouts on the back and store them flat.

LIMITS AND REVIEW

These are craft studies, not species identification or anatomy references.
No cutting-machine compatibility or cutter-ready claim is made.
Inspect recognition and fragile joins at 50 mm on real paper.
Reviewed digitally; physical printing and cutting were not tested.
