PURPOSE

A forklift in side and oblique views, with its mast, carriage and projecting forks visible.

DRAWING FACTS

- Mast-and-forks side view: 150, 100 and 50 mm longest-axis versions.
- Mast-and-paired-forks oblique view: 150, 100 and 50 mm longest-axis versions.

MATERIALS

Plain paper or suitable card, pencil, ruler and scissors.

HOW TO USE THESE PAGES

1. Choose a view and size. Print the matching paper edition at actual size (100%); measure the 50 mm reference bar.
2. Trace or color inner marks. For a loose cutout, cut the outer edge only.
3. Inspect the 50 mm contour and narrow joins digitally. Use a larger size when a small detail may be hard to handle.

LIMITS AND CHECKS

- Stylized craft study, not an engineering or architectural construction reference.
- Loose paper cutout artwork is not a cutter-ready stencil.
- Reviewed digitally; physical printing and cutting were not tested.
