Curved paper visor display study

ex2-1193 / LETTER / Parts overview - NOT A CUTTING SHEET

USE THE FOLLOWING PATTERN SHEETS AT ACTUAL SIZE.

These miniature views identify the supplied patterns; they are deliberately reduced.

1. Pattern 1

1 pattern sheet supplied. Printed details are not cut lines unless explicitly marked.

Solid cut boundary / dashed score / shaded joining area. Read the full instructions.

Dry-fit the parts before gluing. Keep this overview beside the full-size pattern sheets.

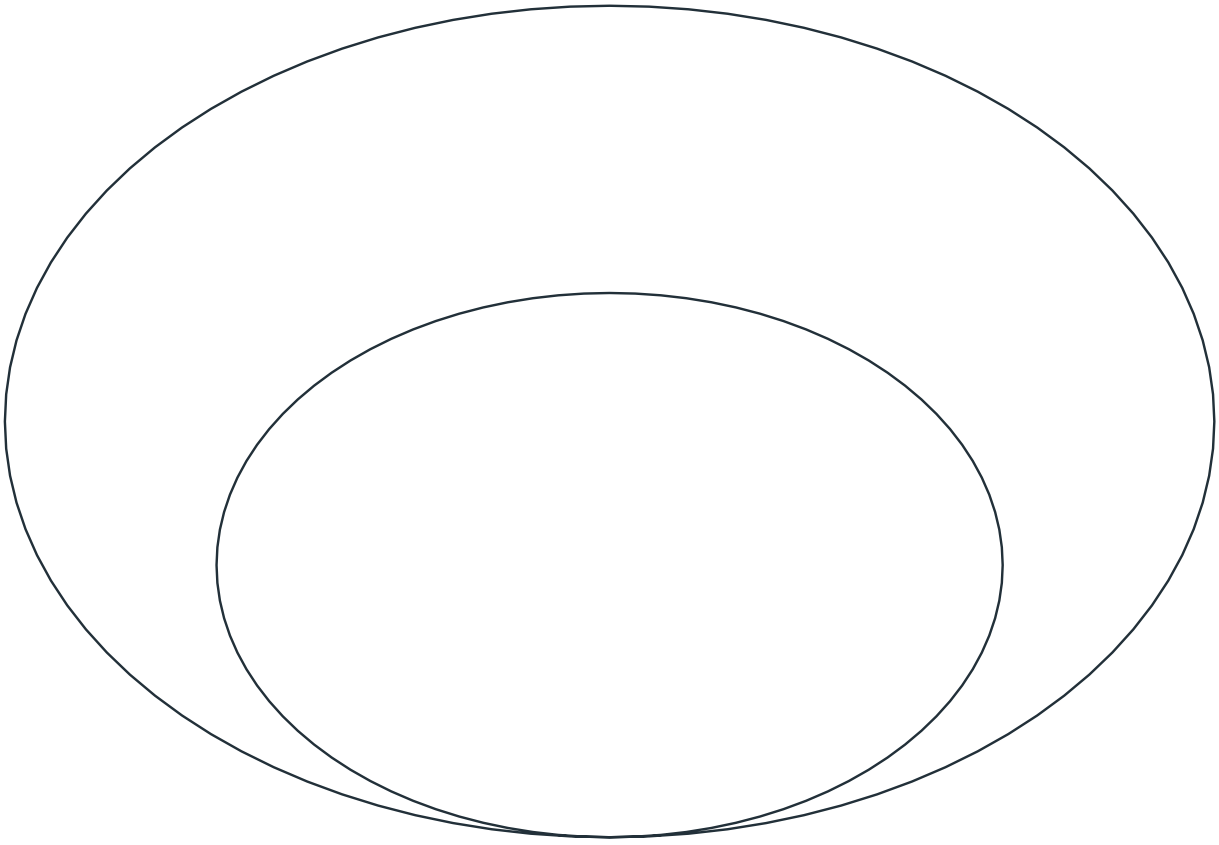

50 mm print check

Print at actual size / 100%. Disable fit-to-page.
Use the paper edition that matches the printer tray.

Curved paper visor display study

ex2-1193 / LETTER / Instructions

PURPOSE

Curved paper visor display study. Not sun or eye protection and not a fitted hat.

DRAWING FACTS

- Print at actual size and check the 50 mm reference before cutting. This is a hand-held, nonprotective display prop.

MATERIALS

Plain 100 to 140 gsm paper for a first dimensional trial; approximately 160 to 220 gsm card only after confirming the folds. Use a ruler, suitable scissors, a blunt scoring tool and a small amount of paper adhesive. An adult should handle internal cuts, holes and small fasteners.

HOW TO USE THESE PAGES

1. Cut the outline and marked openings with appropriate adult assistance. Do not place paper across a child's breathing passage.

2. Fold and reinforce the separate paper handle, then fix it to the reverse side away from openings.

3. Use as a hand-held photograph or storytelling prop, below the eyes as needed to keep vision unobstructed.

4. Do not attach elastic, tie it around a head, claim sun protection, or call this prop safety equipment. A wearable adaptation needs a separate fit and safety review.

LIMITS AND CHECKS

- Not sun or eye protection and not a fitted hat.
- Drawing dimensions describe flat paper surfaces, not verified internal capacity, load strength, fit or material compatibility.
- No mailing, food-contact, archival, toy-safety, protective-wear or cutting-machine certification is supplied.
- Make a plain-paper trial first; paper thickness and fold accuracy can change the fit.
- Trial: Measure the 50 mm reference and two named component dimensions.
- Trial: Make a complete empty trial and document fold direction, joining order, collision, stability and any fragile features.
- Trial: Repeat the trial using your chosen paper. Check that every join holds and each moving part works freely before decorating.

Print at actual size / 100%. Disable fit-to-page.
Use the paper edition that matches the printer tray.
