Seed packet

Solid: cut / dashed: fold / assembly guide on page 2

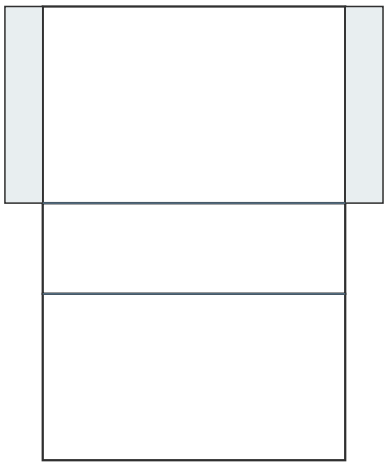

50 mm scale check | Measure after printing

Seed packet

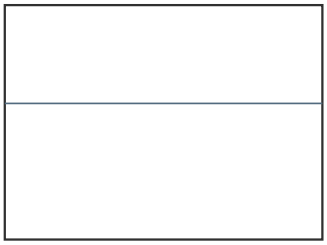

Assembly guide / use with the matching net on page 1

FOLD SEQUENCE / SCHEMATIC, NOT A CUT PATTERN

SHADE = SIDE GLUE TABS

Fold tabs in, then front up.

FINISHED POCKET / TOP OPEN

01 / PREPARE

Print at actual size; measure the 50 mm line. Complete For, From and Message while flat; include the seed name in Message. Trial a spare sheet first.

02 / CUT

Cut only the solid outside contour. Keep both side tabs, the front panel and the closure flap. Dashed lines are folds.

03 / DRY-FOLD

Place printed side down. Crease four dashed lines; turn both 10 mm side tabs inward, then bring the 80 mm front up over them.

04 / JOIN

Glue only where each shaded side tab meets the front. Let the seams dry. Leave the top opening and 28 mm flap free.

05 / CHECK POCKET

The back panel is 60 x 90 mm; folds reduce usable space. Over a tray, trial a few dry seeds and check both lower corners for gaps.

06 / FILL AND CLOSE

Leave room for the top flap, then secure it. If seeds escape, add a small inner paper fold and label it with the same details.
