Paper tray and optional basket handle

Assembly guide / base and optional handle

FINISHED FORM / SCHEMATIC, NOT A CUT PATTERN

OPTIONAL HANDLE

End tabs attach inside

opposite short walls.

01 / PREPARE

Print at actual size and measure the 50 mm line. Trial on spare paper first.

02 / CUT

Cut the tray outside contour. Keep four shaded corner tabs; dashed lines are folds.

03 / JOIN TRAY

Crease base and tab lines. Raise four walls with marks inside; glue each tab behind its next wall.

04 / OPTIONAL HANDLE

Cut the separate 170 x 15 mm strip. Crease its two 15 mm end tabs; curve the middle gently and attach both tabs inside opposite short walls.

05 / FINISH

Let all joins dry. Trial only light contents. This paper basket is for presentation; support it from underneath, not by the handle.
