Artist trading card presentation envelope

Construction notes / Use with the matching template page

01 / Prepare

Print at actual size and measure the 50 mm bar. Fill Artwork, Artist, For and Notes while flat. Use a spare sheet for the first trial.

02 / Cut

Cut only the solid outside contour; keep both 10 mm side tabs. Dashed lines are folds, not cuts.

03 / Dry-fold

Place the printed side down. Crease four dashed lines. Fold both side tabs inward, then bring the lower 55 mm front panel up over them.

04 / Join

Glue each side tab to the front panel only. Press and dry the seams; leave the top opening and closure flap free.

05 / Check fit

The nominal panel is 100 x 65 mm; folds and paper thickness reduce usable room. Trial-fit your item. No standard card size or archival fit is guaranteed.

06 / Finish

After the joins dry, insert the intended item. Fold the top flap over the opening and secure it with a removable seal or small tape piece.
