Accordion message wallet

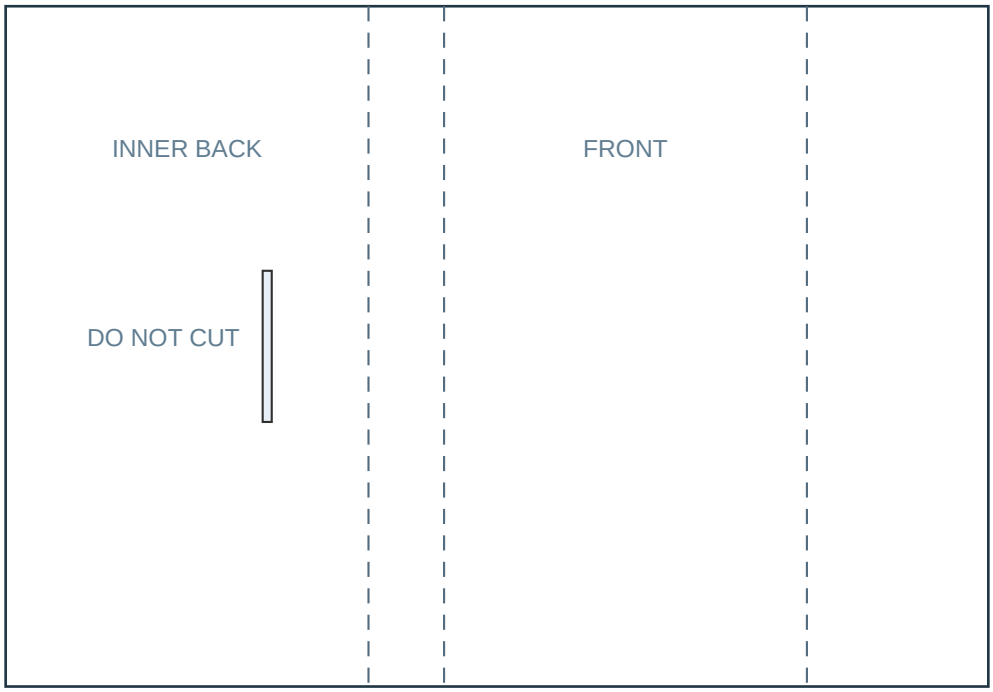

Four message panels / alternate mountain and valley folds

50 mm scale check | Measure after printing

Accordion message wallet

Wallet cover / 10 mm spine / secure with a separate band

DO NOT CUT the narrow slot mark. Close the broad flap with a separate loose paper band or ribbon; it is not a self-tucking tongue.

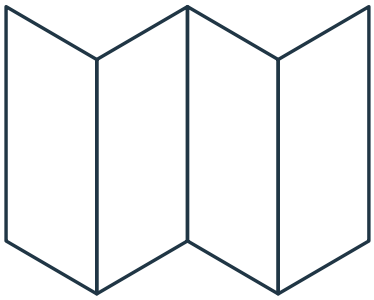

50 mm scale check | Measure after printing

Accordion message wallet

Assembly guide / print at actual size / slot remains uncut

MAKE THE PROJECT

Four 40 x 82 mm message panels
fold as a concertina in a wallet
with a 10 mm spine.

CONSTRUCTION SCHEMATIC

MATERIALS

Use plain paper for a trial; light card, ruler, scissors, blunt creasing tool and paper adhesive for the final piece. Ask an adult to help with small joins.

01 Cut the insert and cover. Keep the broad flap. Leave the narrow rectangular slot mark UNCUT.

02 Fold the insert at 40, 80 and 120 mm in alternating directions. Keep messages in reading order.

03 Crease the wallet back, 10 mm spine and front. Wrap the broad flap around the outside.

04 Attach only insert panel 1 to INNER BACK. Panels 2 to 4 must unfold freely.

05 Add messages. Hold the outside flap with a separate loose band or ribbon; it does not tuck into the slot.

Print at actual size and check the 50 mm bar. The slot is not a cut or closure. Trial-fold and fit before making more.
