Diagonal paper weave - 2 over, 1 under

Sheet 1 / Foundation / Solid = cut; dashed center = temporary fold

140 mm foundation / 12 columns

1. Cut the outer square. Fold crosswise on the dashed centerline.

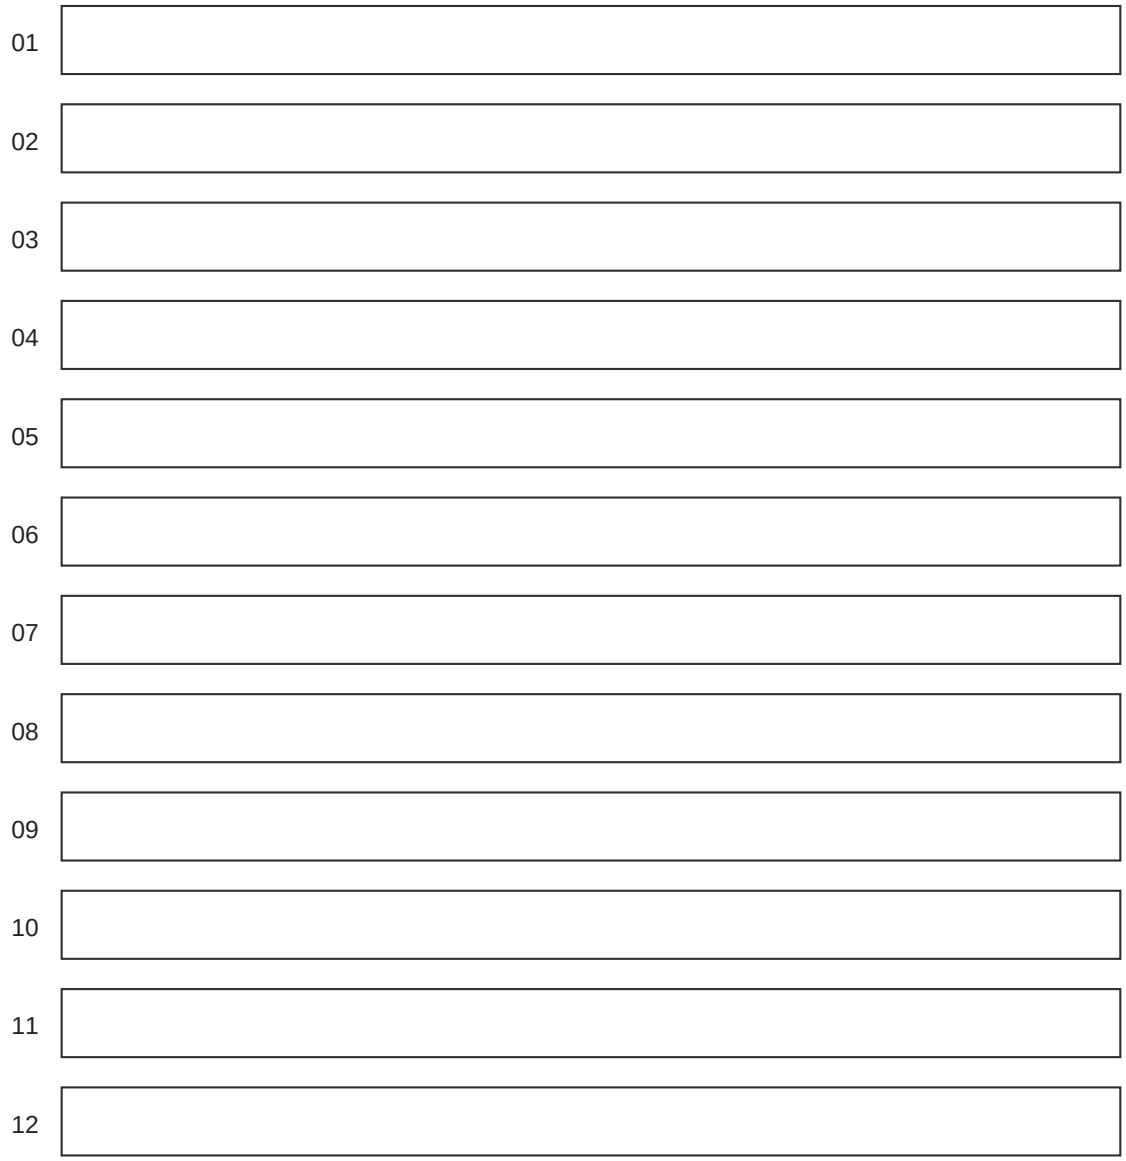

2. Cut each slit from the fold to its stopping dot. Keep the 10 mm outer rails intact; do not cut through the border.

3. Unfold and flatten. Page 2 has crossing strips; keep the page 3 chart nearby.
