Adjustable paper crown strips

Assembly / solid = cut / dashed = fold

MAKE THE PROJECT

Two 164 mm crown strips per sheet; each has a 20 mm joining zone and six triangular points.

YOU WILL NEED

Light card, scissors, paper tape and a flexible measuring strip.

01 Cut both strips, keeping the 20 mm end joining zones. Decorate them while flat.

02 Print another sheet if needed. Test a loose paper band first; do not assume an age-based size.

03 Join strips with at least 20 mm overlap. Three strips give up to about 432 mm circumference; four up to about 576 mm before fit adjustment.

04 Check for a comfortable, easily removable fit. Tape the closure on the outside only. Do not add tight elastic or cord.

05 Use as a temporary supervised paper decoration. Do not cover the wearer's eyes or use during active play.

TRIAL AND LIMITS

Try ordinary paper first. Paper thickness, folds and joins affect the result. Digital layout checked; physical assembly and durability untested.
